

## Aviation fuel safety

More and more often, pilots are required to self-fuel their own aircraft. Many never learned the basics of re-fueling in ground school. We will discuss the hazards and safe practices of refueling, fuel handling and what to watch out for if someone else fuels your aircraft. Also an open discussion on fuel system quirks and tips for how to eliminate excessive air in the fuel tanks.

**Directions:** M-75 to E.Main St.  
East on E. Main St. to end of road. Terminal Bldg.

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
